

## Curriculum

The suggested schedule of study may be completed in four trimesters (16 months) for the Master of Business Administration in Healthcare Management degree. Students must complete all the coursework required for their MBAHM degree within seven trimesters.

The MBAHM program prepares graduates to start their own businesses in their areas of interest. The graduates may also utilize management and leadership skills learned to obtain jobs in marketing, logistics, finance, and human resources at public, private, and non-profit organizations. With the addition of the healthcare concentration, graduates receive specialized knowledge to enter positions in the healthcare industry.
